**F.Y., S.Y. and T.Y. B.Voc.**

**Program: B.Voc.**

**Course: PHARMA ANALYTICAL SCIENCES**

Credit Based Semester and Grading System  
to be implemented from the academic year **2019-2020**

## **Preamble:**

### **Indian Pharmaceutical industry:**

India accounts for 7% of the GDP by chemical sector and 11% of the national export. There are about 20000 registered pharmaceutical units in India and there are about 250 large units, 8000 small scale units and 5 central public sector units. Additionally, the size of the Indian diagnostic and lab services is about 160 billion.

Not marred by recession or inflation, the pharma sector has a competitive advantage of prospering steadily and thus attracts lots of young professionals looking at pharmaceutical as their prospective career option. With the expected growth rate of 14% per annum, Indian Pharmaceutical sector is expected to create more jobs in India in near future and add 45,000 fresh openings to its current strength.

Since 2009-10 more than 900 new drug approvals have been given by the Indian drug regulator. The regulatory guidelines have been revised since the Supreme Court directives in 2011-12. Regulatory requirements are increasing in production, quality control and R & D laboratories. Therefore, the regulatory department in a Pharmaceutical company not only needs a very broad understanding of the regulatory requirements but also must understand the chemical processes of production and quality control, the analytical tests, the pre-clinical studies and the clinical trial reports. Further there is an international strategy to harmonize the guidelines using ICH. With about 25 leading pharmaceuticals and about 100 smaller units involved in exports the requirement of regulatory executives is constantly increasing. Some of the top Indian pharmaceuticals have more than 75 executives employed in the regulatory department alone.

### **The need to develop trained employable human resource:**

The Indian Pharmaceutical and Chemical Industry have always been experiencing a dearth of skilled and industrially oriented human resource. The Industry despite employing students from chemistry, biology and pharmacy background always spends 6 months to one year for training the students for general industry needs like Good Laboratory Practices, Good Documentation Practices and regulatory compliances. The important component of knowledge and implementation of quality in laboratory analysis is scarce in the graduates of chemistry and pharmacy. The skilled manpower requirement is in the areas of R & D, quality assurance and intellectual property. The Pharmaceutical industry sector in India is the one of the strong Export oriented sectors that needs to comply with a multitude of regulatory compliances for marketing the drug formulations abroad. In India itself, the sector needs to comply to stringent regulatory compliances and audits before the drug formulations are marketed. The training in practice of GLP as per the current regulatory requirements is missing. This course will provide manpower that is work-ready.

### **Objectives of the Course**

The course will address the requirements of conducting, managing and meeting regulatory requirements for R&D and testing laboratories in pharmaceutical and chemical industries. Major hurdle faced by the R&D centers at various Pharma laboratories is the lack of adequately trained and GLP oriented personnel. This forms a major setback when the application of sophisticated technology especially in the bio analytical field is concerned. The lacunae become more evident when dealing with newer dosage forms and peptide based drugs. This lacunae needs to be addressed very diligently and the proposed programme is a step in this direction

National Skill Development Corporation (NSDC) has been mandated to set up Sector Skills Councils for the express purpose of sector-specific competencies/skills, developing National Occupation Standards (NOS's) and Qualification Packs (QP's), quality assurance through accreditation of skills acquired by trainees, curriculum development for the skills training, qualification framework and setting of standards and benchmarks, helping in recruitment and placement of trained and skilled workforce, as well as developing a robust LMIS.

The Indian Life Sciences Sector (comprising Pharmaceuticals, Bio Technology and Clinical) has been growing at a CAGR of 17%. In the process, it has been facing a shortage of skilled work force across functions and levels. With this background, CII, in co-operation with NSDC, decided to set up a Sector Skill Council for Life Sciences namely, the Life Sciences Sector Skill Development Council (LSSSDC).

LSSSDC will be Demand led, Comprehensive (taking account of needs of Stakeholders), emphasizing Standards and Quality, with a Sustainable and Scalable model. It will provide industry with a sustained stream of skilled individuals across functional areas and levels, thereby vastly reducing costs associated with re-skilling, attrition and low productivity. In the process it also hopes to help address issue of fake certificates and degrees—an area of major concern to the Life Sciences industry. Alongside, it will provide meaningful livelihood opportunities in the Life Sciences sector to a multitude of job seekers.

**The program will have the following objectives;**

- To develop trained manpower in the field of Pharma Analytical Sciences with specific emphasis for instrumentation skills needed for analysis
- To amalgamate knowledge of classical analytical techniques with modern sophisticated instrumentation and provide training in the analysis of chemicals, drugs, food and other products.
- To introduce the training with powerful tools of instrumentation analysis in routine analysis at manufacturing, QC and research
- To provide exposure to National & International regulatory requirements with reference to drugs and chemicals
- To provide training in skills of analysis and develop knowledgeable and employable human resource
- To provide training in soft skills for efficient communication, technical writing, entrepreneurship and basic business management,

**ELIGIBILITY:**

- Higher Secondary School Certificate (10 + 2), Science or its equivalent, preferably with Chemistry and Biology.
- No age bar

**DURATION: Six semesters of six months each (Total Three Years)**

## LEARNING OUTCOMES:

### 1. Job Role: Lab Technician/Assistant (LFS/Q0509 of LSSSDC) :B. Voc.; Semester I and II

- **Lab technician**, also known as **Lab Assistant**, is responsible to provide all the required technical support to ensure laboratory activities are carried out while adhering to correct procedures and health and safety guidelines. They also ensure that all the necessary equipment; materials etc. are readily available and match the desired standards.
- **Brief Job Description:** The Lab Technician will set up the lab equipment and apparatus for smooth execution of experiments and tests. The role holder will also provide all the required technical support to ensure laboratory activities are carried out while adhering to correct procedures and health and safety guidelines. They also ensure that all the necessary equipment's; materials etc. are readily available and match the desired standards.
- **Personal Attributes:** The individual should have to develop good knowledge of the Pharmaceutical industry. Student should have good analytical skills and should demonstrate the ability to understand and predict the future demand. He/she should demonstrate good estimation skills.
- **Learning Outcomes:**
  - Clear understanding of organisational role of Lab. Technician / Assistant
  - Skills for Planning Laboratory work
  - Operations of basic laboratory instruments and measuring devices
  - Clear understanding of Safety and Health guidelines
  - Fire safety and evacuation procedures
  - Work compliance to standards and SOPs
  - Documentation practices, and GLP
  - Clear understanding of regulatory guidelines and requirements
  - Audits and Audit related preparations
  - Skills of Team Work and leadership
  - Skills of office communication

### 2. Job Role: Validation Supervisor (LFS/Q0305 of LSSSDC) :B. Voc.; Semester III and IV

- **Validation Supervisor** is responsible for implementation of validation strategy to ensure that the validation deliverables meet the quality standards and requirements of company policies and government regulations.
- **Brief Job Description:** Validation Supervisor has responsibilities for performing and overseeing the qualification and validation of manufacturing processes, cleaning procedures, equipment and media fills. Validation activities include writing and executing protocols that comply with plant and regulatory requirements.
- **Personal Attributes:** To develop good knowledge of standard documentation procedures, rules, regulations and statutory requirements in carrying out validation activities. The individual must demonstrate attention to detail and proactive behaviour.
- **Learning Outcomes:**
  - Clear understanding of organisational role of Validation Supervisor
  - Skills for Planning Validation work
  - Understanding of validation requirements of Manufacturing, Operations and Quality

- Operation, calibration, validation and troubleshooting of various laboratory instruments
- Planning and Executing validations
- SOPs of validation
- Clear understanding of regulatory guidelines and requirements
- Clear understanding of Safety and Health guidelines
- Fire safety and evacuation procedures
- Work compliance to standards and SOPs
- Documentation practices, GMP and GLP
- Audits and Audit related preparations
- Skills of Team Work and leadership
- Skills of office communication

### 3. Job Role: Quality Control Chemist (LFS/Q1301 of LSSSDC) : B. Voc.; Semester V and VI

- A **Quality Control Chemist** is responsible for conducting qualitative and quantitative analysis to ensure specified quality of the manufactured products.
- **Brief Job Description:** A Quality Control Chemist prepares and tests samples from all phases of the manufacturing process to ensure that the product quality meets the standards, prepares documents that report test results and is responsible for preserving workplace safety while handling hazardous materials. Also responsible for testing of in-process/input raw materials & packing materials, in-process samples apart from finished products. Also responsible for testing of process validation samples, product stability samples and cleaning validation samples (Rinse samples/Swab samples etc.).
- **Personal Attributes:** The individual should have developed strong analytical technique in chemical testing and instrumental methods of analysis. Good understanding of chemistry and investigational abilities. He/she should have familiarity with guidelines such as GLP, cGMP and principles of Quality Management. The role holder should have attention to detail and excellent organizational skills.
- **Learning Outcomes:**
  - Clear understanding of organisational role of Quality Chemist
  - Skills for Planning Quality Check
  - Understanding of Quality requirements of Manufacturing, Operations and Finished products
  - Clear understanding of QA and QC roles and responsibilities
  - Operation, calibration and troubleshooting of various laboratory instruments
  - Planning and Executing Quality audits
  - SOPs and protocols; design and review
  - Clear understanding of regulatory guidelines and requirements
  - Clear understanding of Safety and Health guidelines
  - Fire safety and evacuation procedures
  - Work compliance to standards and SOPs
  - Documentation practices, GMP and GLP requirements
  - Audits and Audit related preparations
  - Skills of Team Work and leadership
  - Skills of office communication

### Evaluation and Credits:

The evaluation will have 60% weightage to Practical skills while 40% will be for General Component (Theory). The Credit weightage will be one credit for 15 hours of lectures (theory), one credit for 30 hours of laboratory work (practical) and one credit for 30 hours of field work / internship / equivalent training. The credit distribution for the three years B Voc program is listed below:

Year	Semester	Credits for Skill Component	Credits for General Education	Total credits for the Semester	Total credits for the Year
<b>F Y B. Voc.</b>	I	18	12	30	<b>60</b>
	II	18	12	30	
<b>S Y B. Voc.</b>	III	18	12	30	<b>60</b>
	IV	18	12	30	
<b>T Y B. Voc.</b>	V	18	12	30	<b>60</b>
	VI	18	12	30	
<b>Total</b>					<b>180</b>

The evaluation will be based on a continuous assessment system with internal and external components. For general education component 60% marks would be for the external evaluation made at each semester-end and 40% marks would be for the internal assessment component during each semester. The internal assessment would involve 50% marks for a Test based evaluation while the remaining 50% marks would be based on assignments, minor projects, quizzes, literature survey, student involvement etc. There would be no internal assessment component for the evaluation of Practical Skill component.

The scheme of examination and allotment of marks for each semester are tabulated below;

**SEMESTER I**

<b>B. VOC. (PHARMACEUTICAL ANALYSIS)</b>				
<b>FIRST YEAR (1000 MARKS PER SEMESTER)</b>

**SYLLABUS IN DETAIL: B.VOC, PHARMA ANALYTICAL SCIENCES:**

**SEMESTER – I**

Code	Paper	Credits	Lectures	L/Wk
<b>Skill Component</b>				
RUVPAS101	<b>Units of measurements, Basic Lifesciences and Orientation to QC</b>	2	30	2
	<ul style="list-style-type: none"> <li>• Orientation to Life science Industry and Sub-sector</li> <li>• Standards for Manufacturing in Life Sciences and Organization in Life Science Industry</li> <li>• Units of weights and measurements – concept of normality, molarity, molality standard solution and their applications, Bonding and structure of organic compounds, IUPAC Nomenclature</li> <li>• Basics of sample preparation, preservation and storage</li> <li>• Biomolecules: Basic structures and functions</li> <li>• Help the lab/ QC Chemists/Research associates in performing the experiments and analysis.</li> </ul>			
RUVPAS102	<b>Molecular Interactions and Basic Laboratory Operations</b>	2	30	2
	<ul style="list-style-type: none"> <li>• Concept of atomic mass, atomic number, isotopes and isomers, Reactions of aliphatic and aromatic compounds</li> <li>• Concept of Ka, Kb and Km (enzymes) and their applications</li> <li>• Basics of Formulations</li> <li>• Cell and basics of cell biology</li> <li>• Carry out preparation of solution and reagent</li> <li>• Carry out washing, processing and drying of the glassware/plastic-ware for experiment</li> </ul>			

<b>RUVPAS103</b>	<b>Applied Physics, Biological Systems and Basic Laboratory Management</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>• Concept of electromagnetic spectrum, Dispersion of light, Scattering of light and their applications</li> <li>• Basic mechanics and optics and their applications in instrumentation</li> <li>• Scientific Knowledge about Analytical Equipment and Machinery</li> <li>• Overview of organ systems in plants &amp; animals</li> <li>• Pathogenic and other organisms (food and Pharma industry)</li> <li>• Handling of chemicals before, after experiments, transferring them in smaller containers and labeling them</li> <li>• Maintain records of lab usage, storage of chemicals, labels, date of opening and closing</li> </ul>			
<b>RUVPAS104</b>	<b>Sampling, Applied Statistics and Laboratory Safety</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>• Concept of sample, Sampling techniques, sample statistic, population statistics and their application in Pharma</li> <li>• Statistical Analysis of Laboratory data, Standards and Guidelines for sample handling, Methodology for storage area inspection</li> <li>• Statistics in analytical Chemistry</li> <li>• Clean and Reprocess the instruments before carrying out experiment and sterile packaging, sterilization and storage</li> <li>• Maintain a healthy, safe and secure working environment in the life sciences facility</li> </ul>			
<b>RUVPASP101</b>	<b>Practical based on Skill Components and assignments</b>	<b>10</b>	<b>300</b>	<b>20</b>
<b>General Education Component</b>				
<b>RUVPAS105</b>	<b>Basic Chemistry, Macromolecules and Cleanliness in Work Area.</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>• Atomic Structure, Molecules, ions, Chemical Bonds and Chemical Reactions</li> <li>• Life Sciences Industry, its Sub-Sectors and Drug Regulatory Agencies</li> </ul>			

	<ul style="list-style-type: none"> <li>• Carbohydrates, Proteins, fats and their building blocks</li> <li>• Ensure cleanliness in the work area</li> </ul>			
<b>RUVPAS106</b>	<b>Basic principles of Chromatography</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>• Concept of solubility, partition, their applications and water as a universal solvent in living systems</li> <li>• Chromatography: Principles, types and applications</li> </ul>			
<b>RUVPAS107</b>	<b>Skills in Communication, Documentation and Computation</b>	<b>1</b>	<b>15</b>	<b>1</b>
	<ul style="list-style-type: none"> <li>• General inter personal communications, General official communications, Communication and Management, Core Skills</li> <li>• Good Documentation Practices, Ensuring data integrity</li> <li>• Basic Concepts of Safety, Process of Safety Analysis</li> <li>• Introduction to computers, Computer components and organization of computers.</li> </ul>			
<b>RUVPASP102</b>	<b>Practical based on General Education Components</b>	<b>7</b>	<b>210</b>	<b>14</b>

## Semester – II

Code	Paper	Credits	Lectures	L/Wk
<b>Skill Component</b>				
RUVPAS201	<b>Laboratory Reagents, Emergency Procedures and Cell Biology</b>	2	30	2
	<ul style="list-style-type: none"> <li>Principles in the use of indicators, colour reagents, derivatizing agents, Dilutions, dilution techniques and their applications</li> <li>Orientation with organizational policy, Managing Emergency Procedures and First Aid</li> <li>Classification of living systems</li> <li>Structure and function of cell organelles in bacteria, plants and animals</li> </ul>			
RUVPAS202	<b>Chemical Reactions, Medicinal Chemistry and Comparative Biology</b>	2	30	2
	<ul style="list-style-type: none"> <li>Chemical reactions and equilibrium</li> <li>Comparative biology of prokaryotes and eukaryotes</li> <li>Basic Medicinal Chemistry</li> <li>Viruses and Virus Biology</li> </ul>			
RUVPAS203	<b>Applied Optics and Applied Microbiology</b>	2	30	2
	<ul style="list-style-type: none"> <li>Various properties of light, their applications in measurement, Concept of monochromatic light</li> <li>Microscopy and Basic Microbiology, sterilization and disinfection techniques</li> <li>Bacteria, Virus and Fungus : Basic Biology and their control</li> <li>Sources of microbial contamination and their control</li> </ul>			
RUVPAS204	<b>Basic Statistics and Chemical Analysis</b>	2	30	2
	<ul style="list-style-type: none"> <li>Concepts of Quantitative data, qualitative data, their statistical evaluation, Applications of various data representation techniques</li> <li>Methods of analysis : Gravimetry, Volumetry, Introduction to Thermal methods, types of Volumetric Titrations</li> </ul>			

	<ul style="list-style-type: none"> <li>Potentiometry and Polarimetry</li> </ul>			
RUVPAS201	<b>Practical based on Skill Components</b>	<b>08</b>	<b>240</b>	<b>08</b>
	<b>Industrial visits and assignments</b>	<b>02</b>	<b>60</b>	<b>02</b>
<b>General Education Component</b>				
RUVPAS205	<b>Enzymes and Enzyme Kinetics</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>Catalysts and their roles in reactions, Concepts of enzymes and enzyme kinetics (Km value)</li> <li>Coenzymes and co-factors</li> <li>Electron Transport system and ATP synthesis</li> </ul>			
RUVPAS206	<b>pH, Buffers and Applied Mathematics</b>	<b>2</b>	<b>30</b>	<b>2</b>
	<ul style="list-style-type: none"> <li>Properties of solvents, Concept of pH, buffers and their applications.</li> <li>Dissociation Constant, Buffering capacity, H&amp;H Equation</li> <li>Working Principle of pH Meter</li> <li>Basic Principles of Separation Sciences and critical system parameters</li> <li>Regression Analysis, Derivatives and their applications in Analysis</li> </ul>			
RUVPAS207	<b>Effective Communication, Core Skills and Regulatory Agencies</b>	<b>1</b>	<b>15</b>	<b>1</b>
	<ul style="list-style-type: none"> <li>Techniques of effective expression of ideas, General written communications,</li> <li>Documentation in QC process, Core Skills and Professional Skills.</li> <li>Introduction to ICH, WHO and Other Regulatory Bodies (in the context of Current guidelines)</li> <li>Introduction to schedules of current D &amp; C Act of India.</li> </ul>			
RUVPAS202	<b>Practical based on General Education Components</b>	<b>7</b>	<b>210</b>	<b>14</b>

The students will then:</b> <ul style="list-style-type: none"> <li>○ Submit a project report (supported by raw data)</li> <li>○ Make a presentation</li> <li>○ Evaluation by the faculty and an industrial expert in the managerial cadre</li> </ul> </li> </ul>			

Ramnarain Ruia Autonomous College

**Ramnarain Ruia Autonomous College**  
**Credit Based, Semester and Grading System**  
**B. VOC. PAS: List of practical (Semester wise)**

**Semester I:**

1. Introduction of Indian Pharmacopoeia.
2. Introduction of Drugs and cosmetics Act (1940).
3. General Safety Precautions in Laboratory.
4. Demonstration of Laboratory layout, Safety Shower and Eye wash.
5. Laboratory Safety Symbols, Pictograms and Signs used for various Chemical, Gases, Instruments and Procedures.
6. Demonstration of Fire Extinguisher.
7. Weighing salts and liquid samples by using Analytical Balance and its supporting documents (SOP, Log book, Instrument manual, Instrument failure record and IQ/OQ/PQ).
8. Introduction to Laboratory Glassware.
9. Laboratory Glassware, its types and Glassware washing and cleaning procedures.
10. Various types of Glass pipettes used in analytical laboratory.
11. Types of Auto-pipettes used in analytical laboratory.
12. Measurement of relative humidity in laboratory by using a Hygrometer (Wet & Dry Hygrometer).
13. Introduction and usage of various types of Water, Distilled Water Apparatus and Milli-Q Apparatus.
14. Calculation of Mean, SD, %CV, % Accuracy by using a MS-Excel.
15. Different types of Gases and Gas Cylinders used in laboratory.
16. Introduction of Various Laboratory Instruments and its usage. (Centrifuge, Cyclo-mixer, Rotary Shaker, Low volume Evaporator, Ultrasonic bath, pH meter and colorimeter).
17. How to issue chemicals/ stationery/ Glassware from Stores.
18. Preparation of Molar solution/ Normal solution / % solution / PPM solution and its Serial and Non-Serial Dilution.
19. pH meter, various types of electrodes and Calibration of pH meter.

20. Various types of Buffers and measurement of pH of various solutions by pH meter.
21. Selection of filters and Absorbance Measurement by using a Colorimeter for various colored solutions.
22. Colorimetric estimation of Potassium dichromate by using a colorimeter.
23. Separation of various coloured dyes by using a Separating Funnel (Partition Separation Technique).
24. Application of electric circuit and assembling of circuit board.
25. Filling of requisition form.
26. Detection and quantitation of Tartrazine from syrups (Colorimetry).
27. Uniformity of Mass for single dose preparation (Weight variation test for uncoated tablets) and Form 39 reporting.

## Semester II:

1. Handling and operation of UV-Vis Spectrophotometer (Labindia UV-Win5).
2. Detection and quantitation of Tartrazine from syrups (Spectrophotometry).
3. Preparation of Linear concentration of Caffeine to determine caffeine contents in OTC formulation by using a Spectrophotometer.
4. Determination and Estimation of caffeine from various caffeine containing products by using a Spectrophotometer.
5. Separation of water soluble dye(s) [Potassium dichromate and stamp pad ink] by partition separation technique and its estimation by spectrophotometer.
6. Titration curve: Strong base and strong acid (0.1M KOH and 0.1M HCl).
7. Titration curve: Strong base and weak acid (0.1M KOH and 0.1M HCl).
8. Calibration of Analytical Balance and Micropipettes.
9. Introduction of statistics and its application in pharmaceutical sciences.
  - a. Different types of graphs/charts used to represent the data.
  - b. Calculation of mean (Arithmetic, Geometric and Weighted mean), Median, Mode, Range and Standard Deviation.
  - c. Arrange the raw data in frequency distribution table.
10. Biostatics: ANOVA, Students 't' test and Chi-Square test
11. Measurement of Refractive index of various pharmaceuticals solutions using a refractometer.

12. Determination of hardness of tablets.
13. IQ, OQ, PQ and its importance.
14. Importance of MSDS and COA.
15. Introduction and importance of Laboratory Sieves.
16. Solvent miscibility and Polarity Index of various solvents.
17. Separation of plant pigments by chalk chromatography and paper chromatography (Polar solvent and non-polar solvent).
18. Identification of Paracetamol from various Paracetamol containing formulations by using a Thin Layer Chromatography.
19. Calibration of Auto-pipettes.
20. Determination of disintegration of different tablets.
21. Determination of Melting point and Boiling point of solids and liquids.
22. Handling and operations of digital melting point apparatus (MEPA Labindia).
23. Application of Gas Chromatography and separation of mixture of volatile solvents.
24. Hands on training on: MS-Word<sup>®</sup>, MS-Excel<sup>®</sup> and MS-Power point<sup>®</sup>

**Additional Training Modules (Mandatory for First Year):**

- a) Visit to an industrial unit (preferably semester II)
  - i. Check-in/ Check-out of staff
  - ii. Security and fire fighting system
  - iii. General workflow in QC/QA department
  - iv. Dress codes
  - v. Emergency exits and layout of work place
  - vi. SOP's and their deployment
  - vii. Hierarchy of approval of reports
  - viii. Organogram of department (QC/QA)
  - ix. Instrumentation and workplace arrangements etc.
- b) Visit to Exhibitions/ Expo on Pharmaceuticals/ Nutraceuticals/ Cosmeceuticals (preferably semester II)
- c) Workshop/ Seminar/ Conference on (one per semester)
  - i. Analytical instrumentation
  - ii. Analytical testing

- iii. GMP/ GLP/ GCP principles and practices
- d) Report submission of additional training modules

### Semester III:

1. Spectrophotometric estimation of sugars by DNSA method.
2. Tap density tester and its applications (Haurner Index Calculation & Compressibility Index Calculation)
3. Various types of tools used in pharmaceutical industry.
4. TLC Silica Gel <sub>Silica 60</sub>: Identification and separation of Fatty Acids by TLC (Omega-3 Fatty acids and cod liver oil).
5. TLC Silica G <sub>F-254</sub>: Identification and separation of steroidal drugs by TLC (Prednisolone).
6. TLC Silica G <sub>F-254</sub>: Identification and separation of Caffeine by TLC (100 ppm to 1000 ppm, Nescafe, Bru coffee with chicory beans and Brook bond Tea etc.).
7. Detection of trans-Anethole by TLC using Silica Gel G <sub>F 254</sub> from Fennel seeds. (European Pharmacopoeial method) (LLE - LVE - TLC - Short UV - Derivatisation).
8. Liquid-liquid extraction and analysis of Paracetamol (Acetaminophen) from matrix by using a spectrophotometer. (Multiple days experiment including 2 sets of CC's, 2 sets of extracted and un-extracted QC's and unknown samples).
9. Demonstration of IR Spectrophotometry, Gas Chromatography, Atomic Absorption Spectrophotometry and flame photometry.
10. Introduction of HPLC with auto-sampler and data integration system.
11. Detection and separation of caffeine by reverse phase HPLC.
12. Detection of caffeine by reverse phase HPLC and optimization of suitable mobile phase.
13. Analysis of caffeine by using RP-HPLC system with auto-sampler.
14. Detection and separation of paracetamol and caffeine by using RP-HPLC.
15. Detection of Barr-body by using compound microscope.
16. Calibration of ocular micrometer.
17. Determination of particle size by using compound microscope.
18. Inorganic chemistry (Qualitative analysis).
19. Organic chemistry spotting.
20. Deep freezers: -20°C, -70° & their usage
21. Use of scientific calculators.

#### Semester IV:

1. Analysis of Effluent water : Physical parameter analysis, Colorimetric estimation of iron, Hardness of water by complexometric titration, total dissolved solid, Flame photometric analysis, Determination of refractive index.
2. Introduction of dissolution testing apparatus.
3. Determination of functional group in compound(s) by using Infrared spectroscopy (pellet, ATR and DRS methods).
4. Stability chamber, its use and its calibration requirements.
5. ELISA: Introduction and estimation of suitable analyte using an ELISA kit.
6. Studying changes in protein conformation by Ostwald Viscometer.
7. Filling of requisition and Application for Plasma, Spirit License & renewal, Request of Bio-Waste disposal, Bio waste disposal (Agreement)
8. Volumetric titration (Acid base, Precipitation, With Eriochrome black T- indicator, with pH meter).
9. Estimation of Moisture
10. Acid value
11. Saponification Value
12. Iodine value
13. Peroxide value
14. Un-saponifiable matter
15. Conductivity meter (Purity of water and types of water)
16. Nephelometry (Water analysis)
17. Calibration of pH meter, Centrifuge (RPM)
18. Soxhlet extraction of total fats from a sample.
19. TLC  $R_{F-254}$ : Identification and separation of Paracetamol by TLC (100ppm to 1000ppm, Paracip 500 and Combiflam).
20. Detection and Separation of Amino acids by TLC using Silica Gel G. (Plummer/one directional).
21. Advance training on: MS-Word<sup>®</sup>, MS-Excel<sup>®</sup> Macros and MS-Power point<sup>®</sup>
22. Levey-Jennings plots and their applications using MS-Excel<sup>®</sup>.
23. Microbiology: Aseptic Techniques, Gram staining, Isolation, MIC of disinfectant and Evaluation of work area sterility.

### **Additional Training Modules (Mandatory for Second Year):**

- a) Workshop/ Seminar/ Conference on (one per semester)
  - i. Analytical instrumentation
  - ii. Analytical testing
  - iii. HPC/ GC
- b) Industrial training (one month minimum, during semester breaks)
  - i. Instrumentation lab/ QC lab
  - ii. Work flow
  - iii. Organogram
  - iv. Hierarchies of approvals
  - v. Calibration
  - vi. Archival procedures
  - vii. Inventory procedures
  - viii. Staff training
  - ix. Work ethics
- c) Report submission of additional training.

### **Semester V& VI (Along with internship)**

1. Documentation of formulations received for testing and its storage.
2. Documentation of formulation dispense for a trial.
3. Line clearance and dispensing of formulations for clinical trial subjects.
4. Dissolution Testing: USP 1 and USP 2 systems, Monograph requirements.
5. Dissolution of Aspirin tablets: conventional & gastric resistant. Report preparation as per IP.
6. In vitro Dissolution different types of solid dosage forms and their compliance to IP.
7. SOP preparation of various instruments using their manuals.
8. GC: estimation of alcohol content.
9. GC-MS: Use of GC-MS library (Demonstration).
10. LC-MS: Mass spectrum of API and its purity evaluation (Demonstration).
11. Fragmentation pattern in LC-MS using different energies (Demonstration).
12. Estimation of aspirin/ paracetamol from formulations using LC-MS (Demonstration).

13. Linearity and application of IS in LC-MS analysis: spiked plasma samples (Concept with chromatograms).
14. Microbiological testing: sterility testing as per IP.
15. Microbiological testing: Microbial load.
16. Microbiological testing: Vitamin B12 assay as per IP.
17. Microbiological Assay: Ampicillin.
18. Antibiotic Susceptibility Tests.
19. Working under Laminar Flow : Carry out a Microbiological Test.
20. Calibration of HPLC, GC: concepts, need and reporting.
21. Validation of a suitable HPLC method for bioanalysis.
22. QC Audit of Bioanalytical report of a BA/BE study: chromatograms and bioanalysis.
23. QC Audit of clinical report of a BA/BE study :CRFs, Log records and ICF
24. Preparation and facing audits by outside agencies (including US FDA Form 483).
25. Documentation and preparation for submitting a protocol to ethics committee
26. Karl Fischer titration for moisture content.
27. Literature survey and develop a protocol of bioanalytical method for an API
28. Communication skills: Reporting OOS, Troubleshooting, non-compliance etc.
29. HPTLC (spotter & scanner): Linearity and estimation of a bioactive compound from a formulation.
30. FTIR: Interpretation of IR spectrum for molecular characterisation and purity evaluation.
31. PAGE: Separation of milk proteins (different types of milk).
32. Isolation of plasmid and its electrophoretic separation.
33. Stability studies of formulation.
34. Assay of Vitamins.
35. Closure for injections.
36. Indicators and Reference Substance.
37. Calibration of HPLC and Spectrophotometer.
38. Advance computing, data analysis and interpretation of results by using softwares like Graph Pad prism<sup>®</sup>, SAS<sup>®</sup>, WinNonlin<sup>®</sup>, SPSS<sup>®</sup> etc. (Demonstration).
39. Vendor assessment and vendor qualification
40. Skills for;
  - a. Preparing protocols of analysis and validation

- b. Preparing schedules and timelines
- c. Preparing reports
- d. Deciding annexures / supporting documents
- e. Archiving and storage of data / samples.

**Note:**

- a) The schedule of practical may be adjusted to accommodate industrial training of students.
- b) Practical(s) may be completed at the industry site also (if possible).
- c) Report submitted and presentation on industrial internship will be evaluated during examination.

Ramnarain Ruia Autonomous College

## List of books and references:

### *Regulatory Guidelines:*

1. British Pharmacopoeia
2. Drugs and cosmetics Act of India
3. European Pharmacopoeia
4. Indian Pharmacopoeia
5. International Pharmacopoeia
6. United States Pharmacopoeia

### *Reference Books*

7. An introduction to Drug design, S.S. Pandey and I R Dumeck, New Age International
8. Analysis of food and beverages, George Charalanbous, Academic press 1978.
9. Analytical Chemistry, G. D. Christian, 4th Ed. John Wiley, New York (1986)
10. Analytical Biochemistry, D, J. Homes and H. Peck, Longman (1983)
11. API (The Ayurvedic pharmacopoeia of India), Part I, Volume II, 1st Ed., Government of India, Ministry of Health and Family Welfare, Department of Indian system of medicine and homoeopathy, New Delhi, 1999
12. Applied chemistry, a text book for Engineers and technologists by H.D. Gesser.
13. Arnold D. L., Grice H. C. and Krewski D. R. (Eds.), Handbook of in vitro toxicity testing, Academic Press Ltd. London, 1990.
